Professional Summary

Java Full Stack Developer with 2+ years of experience designing and developing enterprise applications using Java, Spring Boot, React.js, SQL, and REST APIs. Experienced in microservices, distributed systems, Kafka/RabbitMQ, database optimization, Docker, CI/CD, AWS/Azure, and AI/LLM integrations. Hands-on experience building healthcare applications, RESTful backend services, and data-driven analytics platforms.

Technical Skills

Languages	Java (17/21), Python, SQL
Backend	Spring Boot, Spring Cloud, Spring AI, Spring MVC, Spring Security, JPA/Hibernate, REST APIs
Database & Caching	MySQL, PostgreSQL, Redis
Generative AI	LangGraph, RAG, LLM Orchestration, AI Agents
Frontend	React.js, JavaScript, HTML5, CSS3
Security & Messaging	OAuth2, JWT, Keycloak, RBAC, Kafka, RabbitMQ
DevOps & Cloud	Docker, Kubernetes, CI/CD, AWS, Azure
Testing & Monitoring	JUnit 5, Mockito, Integration Testing, Azure Monitor, AWS CloudWatch
Architecture	Microservices, API Gateway, Service Discovery, Event-Driven Architecture, Distributed Systems
Tools	Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, GitHub Copilot, Claude Code, Cursor

Professional Experience

Calance Software Pvt. Ltd. Sep 2026 – Present

Java Developer — Client: UTIITSL — Projects: ESIC & ESIS Delhi, India

- Develop **healthcare dashboard services** using **Java, Spring Boot, and MySQL**, covering beneficiaries, referrals, claims, payments, and hospital analytics.
- Design and integrate **RESTful APIs** to deliver healthcare KPIs, financial summaries, and hospital-level reports to **React.js dashboards**.
- Develop and optimize **complex SQL queries** for admissions, claim submissions, settlements, approved amounts, and deductions, supporting operational and financial reporting.
- Implement **dynamic KPI dashboards and multi-level filtering** across date ranges, financial years, Regional Centres (RC), states, hospitals, and Top-N rankings.
- Investigate **data discrepancies and API integration issues**, refining query logic and backend responses to improve reporting accuracy.

Migun India Pvt. Ltd. May 2024 – Aug 2026

Software Engineer New Delhi, India

- Developed **healthcare and customer-management applications** using **Java, Spring Boot, React.js, and MySQL**, supporting customer inquiries, consultant appointments, therapy bookings, and service workflows.
- Built **RESTful APIs** using **Spring Data JPA and Hibernate**, with authentication and role-based access control through **Spring Security, OAuth2/JWT, and Keycloak**.
- Wrote unit tests using **JUnit 5 and Mockito** to validate backend business logic and containerized applications using **Docker**.
- Developed **CredAssist360**, an AI-powered healthcare provider credentialing platform using **Java, Spring Boot, Spring AI, and Azure OpenAI**, supporting provider onboarding, document processing, and **Primary Source Verification (PSV)**.
- Implemented **AI-assisted verification workflows** integrating external credentialing services, with **Human-in-the-Loop (HITL)** review for document validation and compliance decisions.
- Built persistence workflows using **PostgreSQL and Spring Data JPA**, integrated **Azure Blob Storage** for document management, and automated deployments using **GitHub Actions and Azure Container Apps**.

Education

RCC Institute of Information Technology 2019 – 2023

B.Tech – Information Technology CGPA: 9.02

Certifications

- Microsoft Certified: Azure AI Apps and Agents Developer Associate
